NH Token Whitepaper

NH Logo

Token Name: NH
Token Symbol: NH
Network: Polygon (PoS)
Contract Address: [0xF930Cf4150F7cb1108B30Df610f07188Fd794398](0xF930Cf4150F7cb1108B30Df610f07188Fd794398)
Project Website: https://nh15251.blogspot.com/
Project Email: nishantthakar1955@gmail.com

Project Overview

NH is a community-backed experimental token on the Polygon network, developed and maintained by a single solo developer. The project is self-funded and not designed around venture capital, seed, or private sale models. Its primary goal is to explore grassroots adoption through practical implementation, experimentation, and long-term sustainability.

Tokenomics

- **Token Type:** ERC-20
- **Total Supply:** Fixed (details available on contract)
- **Initial Price:** Market-driven, no ICO
- **Token Allocation:**
- Developer: Self-funded & transparent
- Private Allocation: 440,200 NH
- Public Swap via Uniswap: Enabled

Funding Model

Soft Cap / Hard Cap

- **Soft Cap:** Not applicable
- **Hard Cap:** Not applicable
- NH is not part of any public fundraising. There is no capital collection model.

Amount Raised

- $0 (entirely self-funded)

Distribution

- **Token Distribution Date:** Not applicable (gradual utility-based release, no scheduled distribution)

Private & Seed Sale Details

Although no public sale has occurred, the following allocation was defined for internal logic:

Private Sale

- **Token Price:** $0.001 per NH (hypothetical)
- **Allocation:** 440,200 NH
- **Vesting Period:** Not enforced yet

Seed Sale

- **Token Price:** NA
- **Allocation:** NA (Swap-based only)
- **Vesting:** NA

Burn Events

Currently, no burn events have been conducted. Future announcements and transaction hashes will be shared through official blog posts or GitHub.

Community & Future Vision

- NH aims to enable token experimentation at a low cost.
- Encourages learning about DeFi mechanisms such as liquidity provision, swaps, and fee collection.
- No paid promotions, no centralized ownership, and community-verified activities.
